

VENTÜER TECHNICAL DATA SHEET

The Ventüer VL-VF2 is a high performing two-stage weather louvre that provides optimum rain defence. The vertically oriented louvre blades are supported within a flanged 100mm deep frame that ejects captured water to the front of the panel. It can be supplied with bird mesh, insect mesh or dust filters fitted to the rear face.

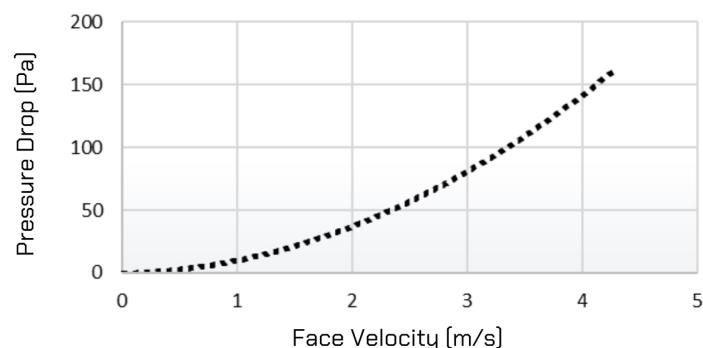

The tables below represent the VL-VF2 performance results for water ingress and pressure drop when tested to BS/EN: 13030.
